

Bowl Chopper

Equipment /Instrument Details

Make : Hobart

Model : 4812

Important features

Bowl Chopper, more commonly known as a bowl cutter or food cutter, is basically a cast iron bowl that holds the food and rotates during the cutting process. There is a stationary blade that spins while the meat is passed through it, and the process continues until the food is chopped to the desired size. There is also a lid that covers the machine, which has an enlarged area to accommodate the spinning blade

Specifications

Bowl chopper consisting of SS bowl, two SS blade and heavy duty motor for clock-wise rotating the bowl. Max capacity 5.0 kg per batch.

Usages

For meat emulsion preparation

Working Principles

Cutting and mixing the ingredients to make the emulsion

Application

For development of emulsion based meat products
